Presidential Scholars Program

This highly competitive program aims to recruit outstanding graduate students to our Graduate School of Biomedical Sciences (GSBS). Since the program’s inception in 2010, 28 students from across the nation have been recruited to this outstanding program. Ten have successfully graduated.

Presidential Scholars enjoy the following benefits:
- $5,000 supplement award to GSBS stipend for up to 5 years
- Eligibility for relocation expenses (up to $3,000)
- Paid health insurance plan
- Academic enrichment activities with an outstanding peer group

We have outstanding training opportunities at UTMB in modern biomedical research areas:
- Biochemistry & Molecular Biology
- Cell Biology
- Clinical Science
- Experimental Pathology
- Human Pathophysiology & Translational Medicine
- Medical Humanities
- Microbiology & Immunology
- Neuroscience
- Pharmacology & Toxicology
- Population Health Sciences
- Rehabilitation Sciences
- Structural & Computational Biology

Our facilities are both state of the art and unique and include:
- Galveston National Laboratory
- Institute for Translational Sciences
- Sealy Center for Structural Biology and Molecular Biophysics
- Sealy Center on Aging
- And many others

“The Presidential Scholars program is a unique and invaluable experience that provides me with opportunities to develop relationships and collaborations with different branches of science. Both peers and mentors bring distinctive perspectives on research and career development that allow for all to benefit.”
Brandon Trent, Presidential Scholar

For early consideration, students interested in applying are strongly encouraged to have their applications complete by November 15, 2017. Interview dates will be in early 2018.
